THE

BETTER  INESS

APPEAL

GET ABOARD THE BETTER **BUSINESS** APPEAL.
WE'RE RUNNING A CAMPAIGN TO BUY MUCH
NEEDED MINIBUSES IN BOTH GHANA AND TOGO.

In supporting our campaign you will also secure yourself a table
at our celebratory gala dinner on Friday 11th October.

futurestarscharity.org.uk

PLEASE DONATE A SEAT
TO HELP US BUY A BUS

FUTURESTARS ENGAGES WITH OVER 4,000 YOUNG PEOPLE EVERY WEEK IN GHANA AND TOGO. WITH TWO BUSES, WE'LL BE ABLE TO DO MORE AND GO FURTHER.

The Futurestars Charity Project is an exciting education-through-sports programme, working with schools in both Ghana and Togo. We deliver physical education and sports coaching, as well as assisting in the refurbishment of schools, so as to create safe and secure learning environments.

The children who attend the Futurestars schools come from some of the poorest communities. Previously, they had no access to physical education or sports at school. We organise pre and after school clubs for both boys and girls to help in developing their sports skills. Sport is also used as an incentive to encourage attendance at core curricular lessons.

Futurestars currently reaches 4,000 children each week through our football and netball coaching sessions. To further encourage and raise aspirations, we are keen for pupils to participate in sporting matches with other schools. Having a minibus in both Ghana and Togo will enable us to transport students safely and mean that activities need not be limited by locality. Students will also be able to attend events such as sporting festivals, for example, where previously we would have had to hire minibuses.

"Our long-term goal is to improve the life of every child who attends a Futurestars supported school."
Simon Milton, Futurestars Director

HELP US TO FILL OUR 20 SEATER GHANA & TOGO MINI BUSES

 - Taken seat

PLEDGE £2K TO BUY TWO SEATS PLUS A TABLE AT OUR GALA DINNER

In celebration of the success of the campaign, we will be hosting a gala dinner as a thank you to all those who have supported us. Your donation will not only enable us to buy two minibuses, but will secure you a table of ten at the event, which will be held on Friday 11th October at Milsoms Kesgrave Hall.

WELCOME TO ISS CBR MAGAZINE + YOUR FESTIVAL PROGRAMME

Welcome to Craft Beer Rising London 2015. As we take over the Old Truman Brewery once again for our third year, we have grown to deliver what we believe is a bigger and better show than ever. We now have a festival app (head to craftbeerising.co.uk to download) that'll give you the low-down on all your favourite brewers and allow you to vote for your top beers of the event. Festival highlights include several brewery launches, new drinks releases, and the UK debut of the five-strong New Zealand Craft Beer Collective. There will also be some fantastic talks in our Mash Tun area hosted by Melissa Cole, including chats with master Austrian Tom Newman on mead, a lager exclusive with master matching brewer Karl Trojan, plus Melissa's own food and beer matching. Then there's the music and food... Soul II Soul legend Jazze B takes our headline spot supported throughout the weekend by Don Letts, The Doctor's Orders, Channel One and Andy Smith amidst a plethora of other musical talent. Food-wise there are lip-smackingly good offerings from the likes of Prairie Fire BBQ and Dosa Deli. Last, but certainly not least, we're giving you this magazine (incorporating the event programme) so you can enjoy some great articles and re-live the fun of Craft Beer Rising when you get home! Thank you for coming and... cheers! Enjoy!

Simon Dehany

ENERGY

electricity while stilling with low
so efficiently produce steam for
power generation and campus hea-
ting and heating. In addition, Texas
A&M recently overhauled its 15 MW
steam turbine generator, increas-
ing total power generation capacity
to 50 MW. The overall CHP system
configured to remain fully operational
during a regional power outage, ensu-
ring critical campus power needs are
met without interruption. The sys-
tem's ability to operate independently
from the grid provides the university
ability for a number of power genera-
tion functions, including power for
facilities, dormitories and a research
hospital. With CHP as a core energy
strategy, Texas A&M's comprehensive
energy management program has
achieved a 45 percent reduction in
energy consumption per square foot
and \$162 million in cost avoidance
since 2002.

THE UNIVERSITY HAS
ACHIEVED A 45 PERCENT
REDUCTION IN ENERGY
CONSUMPTION PER SQUARE
FOOT AND \$162 MILLION IN
COST AVOIDANCE SINCE 2002.

In addition to operating and
maintaining CHP and low-voltage
plants (four on campus and one
remote), the UDS team manages en-
vironmental control and HVAC opera-
tion in the 19 million gross sq ft of
university facilities. UDS maintains
building environmental conditions
using a state-of-the-art building en-
vironmental control system. This com-
prehensive approach to energy management
made it possible to achieve these out-
standing results.

LEGACY CHP SYSTEM
Texas A&M's legacy CHP system
installed at the Central Utility Plant
consisted of a 1910s-vintage 15 MW
General Electric frame 5 gas turbine
generator coupled with a 60,000-hp
heat recovery steam generator (HRSG).

 CMND

Evolving technology. Engaging displays.

Introducing a new generation of hospitality TVs and digital signage.

In an era when hotels are looking to create the hotel experience of tomorrow, new features, technologies and future-proofed solutions are in high demand.

Open up to more with Philips Professional Display Solutions.

Innovating hospitality displays, immersing guests into hotel brands

As guests expect ever more from their hotel experiences, the professional TVs and digital signage solutions specified for hospitality require an innovative new approach. Philips Professional Display Solutions is leading the market to introduce display technologies for the future, bringing tomorrow's technology into play today.

In his speech at the Master Innkeepers Conference in January, Ian Miller, Senior Lecturer at Edele Hospitality & Leisure and expert in both hospitality and information technology, delivered a collection of the top tech trends that will impact hotels this year. High on his list, guests' own content and Chromecast were hailed as multi-use capabilities. At IGC in February, Philips Professional Display Solutions launched their new MediaSuite Pro TV line – "Google-certified and including Chromecast built-in – revolutionising guests' in-room experiences."

What's more, with unique software solutions that deliver consistent brand messaging throughout the hotel, professional displays from Philips offer an engaging solution for boutique hotels through to hospitality groups.

Warm welcome – a new generation of hospitality TVs

Offering a range to cater for any situation, Philips Professional Display Solutions draws upon a rich heritage in innovative technology to ensure its hospitality TVs design and engage. With features that include AmbientLight for a serene setting, immersive viewing experience and up to 4K UHD resolution, the range is powered by Android for a fast, versatile and secure performance and unmatched flexibility. And now the company is leading the industry into a new era, with MediaSuite including Chromecast built-in.

This exciting new MediaSuite Pro TV range delivers new and unparalleled levels of performance, customisation and flexibility. All ensuring businesses can provide the very latest service and entertainment experience. With sizes that start from 32" and now through to 65" models, MediaSuite features direct LED back light and high quality panels to offer superior contrast, black level, brightness and colour saturation. Ensuring outstanding picture performance.

Even better, though, are MediaSuite's brand new Pro TV features. Features that are at the cutting edge of technology. Together with Chromecast built-in, MediaSuite is Google-certified. This brings added benefits that include direct access to the Google Play Store – delivering thousands of compatible Apps, including major services such as YouTube, as well as local news, weather and traffic information.

Anthony Tizzard, Philips Professional Display Solutions Business Manager (BEM), said "MediaSuite is the first Pro TV in the marketplace with built-in Chromecast. This is a truly exciting development for hoteliers, hostellers and their guests, providing a straightforward connection between the in-room TV and any compatible device, with no time consuming both or app download required."

Chromecast offers full and secure access to the content on guests' own devices, allowing instant casting onto the in-room TV in up to 4K resolution.

Extending the brand experience with engaging digital signage

Extending a memorable brand experience beyond the reception desk and guest rooms, Philips professional displays help every hospitality environment to run smoothly and seamlessly together.

From touchscreens at check-in – including the newly launched 32" multi-touch display, through stylish digital signage in restaurants and bars, to flexible and easily configured bend free videowalls for larger wall spaces, Philips professional displays are powered by Android, allowing the installation of web apps directly onto the display and bringing a tailored experience to every audience.

New for 2018, Android 7 has been integrated throughout a new range of D-Line models. This built-in Android OS offers better, more secure connectivity and unrivalled flexibility, enabling hoteliers with fast and seamless deployment of scheduled content.

All Philips professional displays come with a three-year warranty as standard, with all after sales support managed locally. Delivering the local end to end solution for the hospitality market place.

Move into the new generation of hospitality displays with Philips Professional Display Solutions.
www.philips.co.uk/p-m-pr/professionaldisplays/hospitality

Take CMND and deliver a heightened hospitality experience

Networked content management made easy

Beautiful displays and stunning signage are only as good as the systems that manage them. Unlike to Philips Professional Display Solutions, CMND is made up of a range of powerful tools that work together seamlessly. Making content management intuitive and straightforward, delivering impactful results for brand building and business.

CMND & Control

CMND & Control gives the ability to install, maintain, toggle, configure and control all Philips professional displays – across any site, from one location. Display content and updates remotely. Define new channels and languages to each guest. Update firmware and analyse statistics easily.

CMND & Create

From room service menus to navigation for stadium events, CMND & Create enables the professional design and customisation of stunning presentations for guests. What's more, once created, they're easily shared directly from the CMND hub to relevant displays across the network.

CMND & Check In

Transform guests' experience with CMND & Check In, combining a tailored service with total efficiency. Deliver personalised messages, express check out and transparent costing live in the in-room TV, and enable guests to set their own preferences, including language and channel line-up.

Evolving technology. Engaging displays.

Introducing a new generation of hospitality TVs and digital signage.

Businesses where hoteliers are looking to create the hotel experience of tomorrow, new features, technologies and future-proofed solutions are in high demand.

COMMS UNITE
CONNECTING WITH
MASTERLORD

PROJECT SPEC

- Carrier grade network solution
- Premium business handsets
- Web-based reception console

Property development company, Masterlord Estates, chose Comms Unite to reduce its support costs, improve issue resolution, provide accurate billing information and provide tenants with the state-of-the-art technology needed to grow their businesses.

THE CHALLENGE

Based at Ransomes Europark, Ipswich, Masterlord Estates specialises in serviced offices and standalone commercial units, supporting up to 1,000 people, which range from large business HQs to start-ups and charities.

For many years, Masterlord had served its tenants with a fixed phone system and lease line that was starting to show its age. Their existing arrangements worked on a break/fix relationship, leaving the Masterlord IT team overburdened with queries. Moreover, the system did not provide easy access to billing information.

As a result, Masterlord sought a modern communications solution to support the needs of its tenants and to keep up with its own rapid growth.

THE SOLUTION

Comms Unite had already provided services to Masterlord and their good working relationship meant that they were the logical partner. Comms Unite proposed a complete managed solution specifically designed for business parks, offering high levels of reliability, usability and scalability.

Comms Unite installed a carrier grade network solution and premium business handsets across the site, plus a web-based reception console, which has transformed the reception desk by providing visibility of calls across the whole site.

REDUCTION IN SUPPORT COSTS

With the Comms Unite system in place, long waiting times are a thing of the past. Now, tenants simply raise any issues via the web based ticketing system and can expect a reply in just two minutes. In fact, 98% of queries are investigated by an engineer in 10 minutes against an SLA of 20 minutes, thereby significantly improving the tenant experience.

VISIBILITY OF INFORMATION

On the old system, extracting billing information was an arduous task. Now, Masterlord can see exactly how much bandwidth each tenant is using, right down to individual sites, desks and devices. Masterlord is able to bill accurately, and on time for any number of tenants, freeing up valuable time in the back office and improving customer service.

"THE DEPLOYMENT OF COMMS UNITE SOLUTION HAS SIGNIFICANTLY REDUCED OUR IT COSTS WHILE ENABLING US TO DELIVER A FAR SUPERIOR SERVICE TO OUR TENANTS."

- Jonathan Bloomfield
Owner, Masterlord Estates Ltd

SERVICES INFO

Flexible and cost effective leased line broadband connectivity with site wide speeds of up to 300MB.

MASTERLORD PROJECT KEY STATS

For Masterlord, Comms Unite has significantly decreased their infrastructure and IT costs and increased revenue.

98% issues investigated in 10 minutes

300MB leased line broadband speed

50% decrease in cost to tenants

CONNECTING YOUR BUSINESS OUR VISION WORKING WITH US STRONGER TOGETHER

Connecting with Daisy

In our fast moving digital era, businesses are demanding more than just telephony from their business mobile supplier. They need IT products and support that work seamlessly with their communications tools and technology to deliver a competitive edge to their work.

Answering this need, Daisy Distribution is a business proposition, as well as in its vision, its values and its strategy for the future.

Historically the mobile distribution arm of the Daisy Group, Daisy Distribution is growing up and reaching out. Recognising the fresh and exciting wave of customer demand for a more joined up and synergistic approach to business connectivity, the company has extended its product portfolio to include elements from the Daisy Group offering, with one simple aim: to deliver partners and clients a better, more connected way of working across the supply chain, with us, giving greater control.

"We're looking to complement our partners' offerings, taking their businesses forward with our own"

Introducing 12 clear product areas into the mix, including lines and calls, telephony, systems, maintenance and data connectivity together with mobile, hosted telephony and broadband, Daisy Distribution is supporting its partners with a new and exciting end-to-end approach, creating a cohesive, rather than competitive, way of working.

"Adding to our portfolio of products, we're looking to complement our partners' offerings. This has given us a great opportunity to work closely with them to connect their relationships with their business forward with their own," said Julian Parson, Marketing Director of Daisy Distribution.

This means that, should any partner feel unsure regarding a particular product or service, Daisy Distribution is on hand to assist, working directly with the customer while also introducing solutions and services with the products provided by that partner. This adds customer loyalty to partners' brands.

to our partners and delivering solutions to cover a multitude of scenarios.

Recognising that not all partners will wish to take the same approach to their business, Daisy Distribution will also offer a unique approach to selling the products and services it offers.

CONNECTING YOUR BUSINESS WITH 12 DISTINCTIVE PRODUCT AREAS

- Network Services** Flexible, cost-effective voice solutions to ensure two-way communication with customers and suppliers.
- Business Grade Broadband** Connect, engage and work with customers via the internet using a superb broadband solution.
- Mobile** Offer the complete toolkit and wherever, whenever.
- Connectivity** Solutions to help your business work faster and smarter - all day, every day.
- Systems** Tailored telephony systems, enabling your business to interact effectively and efficiently.
- Maintenance** Professional support to get you back up and running in minutes, not days.
- 4G and WiFi** Superior connectivity to be, everywhere and make decisions, even when on the move.
- Hosted Telephony** A cloud-based solution that gives you the features of a traditional telephone system and many more.
- Microsoft** The technology and the telephony to truly adapt to mobile and flexible working.
- Digital Share** Store, manage and collaborate online with professional solutions for business security, as well as success.
- Business Continuity** Services to get you back on track if disaster hits and avoid costly downtime.
- Devices** The platform for mobile working, offering seamless business synergy wherever, whenever.

FOR INTEGRATED DIGITAL TELECOMS WE HAVE EVERY ANGLE COVERED

INTEGRATING IN-OFFICE AND MOBILE TELECOMS WITH IT SOLUTIONS DESIGNED FOR YOUR COMPETITIVE EDGE.

BACKGROUND

Incredibly tight deadlines have been placed on the installation of many large scale solar farms. This means that there is potential for built in problems that could have a serious impact on their reliability and long term electrical export capability.

If left unrectified these problems will result in significant downtime and incur high and unnecessary remedial costs.

THE SOLUTION

Maintech Power Services carries out a detailed inspection of the plant, installation and safety systems.

A comprehensive report will detail any issues related to safety and reliability and will suggest possible improvements in operational procedures.

Estimated costs of repair, replacement and modifications will be given or suggestions put forward for further discussion.

MAINTENANCE SCHEDULE

Maintech Power Services will agree with the farm operator a schedule of works, either time-based or condition-based, that will include regular inspections, planned maintenance and an emergency call out facility.

After every set of inspections a detailed report will be supplied and regular meetings conducted to discuss any issues.

24/7 EMERGENCY RESPONSE

Maintech Power Services offers all contract customers a 24/7 emergency service with a targeted response to site.

All substations are fitted with our own safety signs including the telephone number of our call centre, which is manned 24/7 365 days a year, giving our clients peace of mind and the simplicity of making just one call.

If you don't want your customers to know Midwich are involved, we can arrange for delivery notes to be plain labelled or to state your customer's details when items are delivered correct.

DELIVERY CONTACT

Make your delivery a success - DFD delivery drivers call your customer that their goods are on route. Ensure you pass our sales team a name and mobile number for someone to be on site ready to accept your order.

TAKE A LOAD OFF

Touchscreens are delivered on a pallet so make sure someone is on site to help unload. You can remove the worry of making sure your deliveries go smoothly by discussing the details with us.

CONNECTIVITY IS KEY

No tablet or screen comes with cables. Advise your client that they need to be able to connect to the internet. Our team can recommend which accessories you'll need to complete the job.

DELIVERING ON TIME

Some projector screen manufacturers close during the summer so don't delay. Check your equipment for summer installs in good time to ensure delivery.

WORRIED ABOUT SPACE?

We can help by offering drop ship orders - holding your stock and shipping directly to your customer. We're flexible and can arrange delivery at a time and location to suit you.

MAIL YOUR CUSTOMERS

If you would like us to create a checklist, branded with your logo, to help your customers get ahead with what they need to consider for their summer installs, please contact marketing@midwich.com

WNS
Assistance

PUT YOURSELF IN THE DRIVING SEAT

For many brokers and insurers, dealing with each supplier and the associated hand offs as a claim progresses through to resolution can create immeasurable pressure to an already packed daily workflow.

WNS Assistance does it differently. Offering a comprehensive end-to-end claims management service you will benefit from a dedicated account manager and 24/7/365 access to real time online claim updates via our .Net claims dashboard.

From First Notification of Loss, third party capture and management, dealing with repairers and supervising their work, right through to good old customer satisfaction – all managed in house via your dedicated account manager.

Drive your business forward seamlessly with WNS Assistance.

[BOOK YOUR 2017 SANTIPURNA SAILING RETREAT](#)[View this email in your browser](#)

Enjoy the serenity of the Mediterranean Sea aboard a beautiful Jeanneau Sun Odyssey sailing yacht – the finest way to escape and relax.

At Santipurna, we offer bespoke sailing holidays tailored to your pace. We provide the setting, along with delicious and nutritious breakfasts and lunches, whilst you simply sit back and immerse yourself in the beauty of the surroundings.

ESCAPE
Unwind with us as you sail through the calm teal waters of the Mediterranean. With ambient sea temperatures and spectacular sunsets – this truly is the ultimate mindful and wellbeing retreat.

SAIL
A warm welcome awaits you. Whether you wish to simply sit back and relax or take a turn at the helm, you will feel the stresses and strains of everyday life ebb away as we set sail on our voyage of discovery and relaxation.

EXPLORE
Uncover scenic treasures and remote bays. This holiday combines all the fun of a traditional break without the rigid schedule, allowing you moments of complete serenity to explore deeper aspects of peace within you.

Join us for a magical and mindful experience.
For further information, please contact Katie or Jon.
Katie: +44(0)7500 728444 | Jon: +44(0)7787 513205

Whilst you enjoy a trip with us, you are also supporting **Save the Children**. A percentage of what you pay goes to the charity and in addition to fund raising, each year we donate two weeks on our yacht to disadvantaged children.

INTRODUCING VELOCLOUD

REDUCE YOUR MPLS COSTS, INCREASE NETWORK UPTIME AND EXPAND YOUR WAN AT YOUR PACE

Multiprotocol Label Switching (MPLS) is great at connecting your datacentres and branches but let's face it, not every location needs the super-fast access that it provides.

By identifying your non-business critical data usage, and re-routing it over a local broadband connection, you can dramatically reduce your existing MPLS costs without compromising on access to data.

WHAT VELOCLOUD DOES FOR YOU

Working with world-class DS-WAN providers VeloCloud, we provide a complete managed and secure IP VPN backup. The super-secure layer overlays your existing MPLS infrastructure, allowing you to reap the benefits of VeloCloud without losing out on the MPLS investment you've already made.

"Broadbase provides a really easy way for companies using a dedicated MPLS network to reduce network costs. Using the VeloCloud product, companies can utilise MPLS where it's needed and reroute cheaper broadband to non-business critical points in the network."

MARK AMOSS - DIRECTOR

BENEFITS OF BROADBASE & VELOCLOUD

VeloCloud provides customers with a proven, cost-effective way to expand your WAN. Working with Broadbase, you could:

- Cut costs** - review traffic patterns, identify non-critical data and route it over cheaper broadband to free up expensive bandwidth
- Increase flexibility** - VeloCloud simply overlays your existing MPLS network and can be redeployed at any time
- Improve compliance** - monitor user activity at Mac & PC level and set data policies to increase efficient data usage across your organisational sites
- Fast to implement** - deploy VeloCloud from your premises and out to branch in minutes

"VeloCloud is available on a free, zero-risk, 30-day trial. Get in touch to see the difference it could make to your MPLS costs."

DARRYL TISHLER - DIRECTOR, BROADBASE

ABOUT BROADBASE CONSULTING

Broadbase offers a range of diverse and modern telecommunication products and services. Unlike established Telcos, we can react quickly to your needs to deliver bespoke, integrated and cost-effective solutions to your networking needs. Comfortable working locally and around the world, we also provide a suite of data and voice products using our own Cisco hardware, enabling you to connect your company wherever you are.

To learn more about VeloCloud, get in touch today:
broadbaseconsulting.uk

bb broadbases NETWORK SOLUTIONS

SUPPORT A MODERN & GLOBAL WORKFORCE WITH POWERFUL, SIMPLE VOIP SOLUTIONS FROM BROADBASE

At Broadbase, we're constantly innovating, so we can keep up with the changing requirements of our wireless Broadbase network users. We're always offering to collaborate with you to ensure our services are relevant, effective and up to date.

VIRTUAL PRIVATE NETWORKS (VPMN) AT A GLANCE

- The Broadbase VPMN provides that "anytime, anywhere" access your employees need and your business requires.
- Broadbase VPMN provides a secure, fully managed, easy-to-use network (MPLS, SD-WAN, cloud managed).
- Broadbase gives you control over your network, so you can be the primary user of the system that supports the business units.

Learn why virtual private networks are available across our entire suite of Broadbase SD-WAN and cloud managed services from Broadbase. Increase from 100% managed, managed 40% and self-managed 60% to your existing network or let us manage it for you.
